Technical Skills

Programming: C#, BASIC,JS
Databases: SQLServer, MariaDB / Postgres, MongoDB / Flat-File systems
Front-End Technologies: React.js, Blazor, MAUI, JS, HTML/CSS, Bootstrap
Back-End Technologies: .NET, Node.js,Express, Rails, PHP

Testing: Functional Testing, Integration Testing, Unit Testing, End-to-end testing, Performance testing
Workflow/Tools: Git,CI/CD, Agile, Waterfall, LLMs
Project Management: Jira, Accello, Trello

Experience

Programmer / Analyst | Berkshire Hathaway | September 2022 - Present
- Ensure data integrity is prioritized and that failsafes exist at critical junctures and pass-throughs.
- Extend, refine and maintain a custom, Warehouse Management System(WMS) designed to track, store and analyze large quantities of real-time and archived data.
- Design, architect and build modern components to replace outdated processes and workflows.
- Design, write and leverage algorithms and quick-fix programs to correct real-time data, workflow mistakes / user error, missing data, etc... Whenever possible, integrate fixes directly into existing programs to prevent future iterations of similar problems.
- Work with operations to best understand where automation will make the biggest impact.
  - Designed and implemented a pallet dimensioning process, leveraging heavy machinery which automates the dimensioning and weighing shipments, improving processes for operators while optimizing efficiency for operations as a whole..
- Write documentation for the current environment when changes are made or when inadequate explanations don't optimize efficiency..

Junior eCommerce Developer | Hall Internet Marketing | November 2021 - August 2022
- Responsible for overhauling repositories with updated configurations for automation of CMS updates.
- Regular testing of sites to identify and remove PHP errors, as well as updating PHP versions to improve website speed and security.
- Custom configuration of products / services specific to needs and vision for each website.
- Work with national companies to conditionally restrict services and offerings depending on geolocation data.
- Implement custom solutions with PHP, JS, HTML/ CSS as needed.

Website Support Manager | Links Web Design | April 2021 - October 2021
- Managed 200+ Wordpress, Joomla, Prestashop websites and ecommerce sites across 25 servers.
- Utilized AGILE practices to manage a team of developers by addressing developmental requests based on timeframe to complete, as well as workload and available skill sets across the team.
- Wrote / tested code for Wordpress Themes using PHP and Bootstrap to implement custom functionality as needed.
- Built and maintained Woocommerce stores.

Apprentice Full Stack Developer | Launch Academy | September 2019 - February 2020
- Completed 30-week immersive bootcamp specializing in full-stack web development best practices along with relevant, real-world problems and the skills needed to address them.

Other Experience

Business Account Manager | Wayfair | 2016 - 2018
Contractor | Dolly | 2018 - 2021
